

About us.

We provide diagnosis of diseases and monitoring of animal and flock health in farms and poultry through our diagnostic laboratory services. Our tests in the veterinary sector includes animal feeds, infected organs, serological analysis and water analysis of poultry and swine farms. In addition, we provide specialist advice to veterinary surgeons of farms and in other animal sectors.

- Classical swine fever virus
- Aujeszky's disease
- Porcine reproductive & respiratory syndrome virus

Sample type: Pig blood serum

Mycotoxin Analysis

- Aflatoxin
- Fumonisin
- Ochratoxin
- T-2 toxin
- Zearalenone
- DON

Sample type: Feed meal, fish meal

Microbiology (Water)

- Heterotrophic plate count (pour plate)
- Coliform (MPN)
- Total E. coli count (MPN)
- Salmonella

Sample type: Livestock drinking water, pond water

Microbiology (Organ)

- Bacteria isolation and identification
- Antibiotic sensitivity test
- *Salmonella*

Sample type: Liver, meat, heart, lung, yolk, kidney, spleen, anal swab

Microbiology (Feed)

- *Salmonella*
- Yeasts & moulds

Sample type: Animal feed (Chicken, pig, fish, etc.), pet food

Chemical (Feed)

- pH
- Moisture
- Ash
- Crude protein
- Crude fibre
- Pepsin digestibility
- Crude fat
- Phosphorus
- Calcium
- Protein solubility index
- Salt (as NaCl)

Sample type: Animal feed (Chicken, pig, fish, etc.), pet food

Chemical (Water and Wastewater)

- pH
- Heavy metals (As, Cu, Hg, Na, Cl-, Ca, Mg, Mn, Fe)
- COD
- BOD5
- TSS
- TDS
- Salinity
- Oil & grease
- Ammoniacal nitrogen
- Nitrate-nitrogen
- Total nitrogen
- Phosphorus

Sample type: Livestock drinking water, pond water, wastewater

Veterinary Consultation

For an arrangement of consultation with our veterinarian, contact us through our email or phone number.

For more details on the specific tests we offer, drop us an email at tntlab6700@gmail.com
