

About Us

Established in 2005, T&T Borneo Laboratory Sdn. Bhd. started out as a laboratory facility to assist the agricultural industries of Borneo region ranging from laboratory testing, veterinary consultation and technical support.

With the increasing demand for laboratory analyses over the years, we have expanded our services to include analytical testing for manufacturing facilities and other industries ranging from food, feed, fertiliser, chemical, water treatment and more.

In assurance of our reliability and quality as a laboratory, we have achieved SAMM ISO/IEC 17025 accreditation (No: SAMM 778) which is recognised by the International Laboratory Accreditation Cooperation (ILAC) to meet international regulations and standards.

As an independent service-oriented company, we are committed to be responsive and responsible with our analytical approach to provide prominent and effective quality work. We also pledge to treat our valued clients with strict confidentiality. Our continuous growth to excellence is engraved within us as our core value to be an internationally recognised premier laboratory service provider.
